ABOUT ME

At Binus University's Faculty of Information Systems, I am immersed in the field of Business Analytics, developing a strong grasp of data analysis and the application of information technology for strategic business decision-making. My expertise includes advanced Excel and Tableau, which allows for proficient data handling and the creation of engaging visualizations. With a solid background in programming and database management, I am skilled in Java, MySQL, and JavaFX. My experience with academic projects reflects my dedication to precision, adept problem-solving abilities, and the clear presentation of analytical insights.

EDUCATION

BINUS University
2027
jakarta

UNDERGRADUATE. GPA: 3.76/4.00

I studied at Binus University, Faculty of Information Systems, majoring in Business Analytics. The program emphasizes the integration of information technology and data analysis to support strategic business decision-making. My coursework provided a solid foundation in data management, business modeling, and the application of analytics to generate actionable insights.
